## DETAILED ACTION

### *Continued Prosecution Application*

The request filed on 5/2/03 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/161981 is acceptable and a CPA has been established. An action on the CPA follows.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Narui et al (US 5,438,583).

Narui et al disclose a method of making laser by the following process steps: forming a semiconductor layers "3,4,5" including active layer over the substrate; patterning and etching to form mask "3,4,5" and growing semiconductor cladding layers "6,7,8", wherein semiconductor cladding layers "6,7,8" and mask layer "3,4,5" has constant elements. It is inherent in the invention of Narui, cladding layers "6,7,8" are grown at higher temperature than the temperature at which active layer is grown.(see fig. 9 and related description.)

Art Unit:

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4, 9-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Kamiyama et al.

Kamiyama et al discloses a method of selectively growing gallium nitride semiconductor layer "1033" using silicon nitride stripe-shaped mask "1035"(see fig. 35 A- 35 D and col. 22, lines 1-22).
